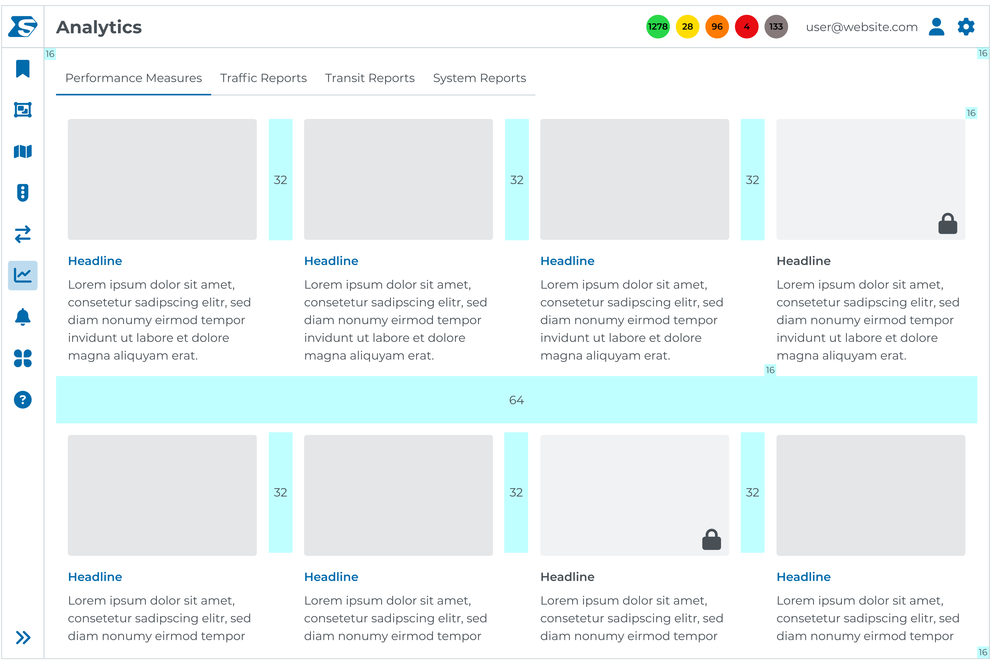
Layout - Analytics / Apps

Overview

The analytics page features a full width and full height grid of **app cards** with 4 columns and variable rows. The **entire app card is a hyperlink** and can be clicked to get to the respective analytics page. If the height exceeds the available screen space, a scrollbar appears.



Core elements & construction

App cards have **two states: Default and disabled.** Disabled cards are non-interactive.

The card width adjusts to the available screen space, with a **minimum-width of 200px.** Their height is variable and adapts to the length of the copytext. Thumbnails scale according to the card width.
