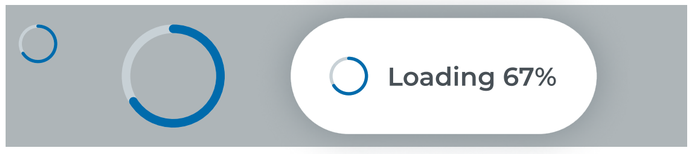
Loading Indicator

Colors

Light mode

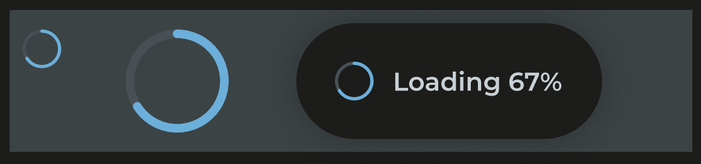
Default (on white)



- **loading-primary**
- **loading-secondary**
- **shadow-primary**
- **overlay-primary**

Dark mode

Default (on dark)

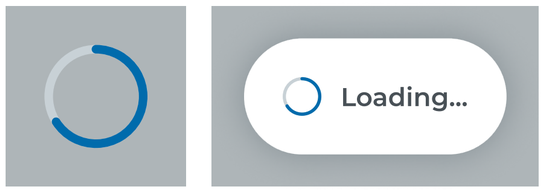


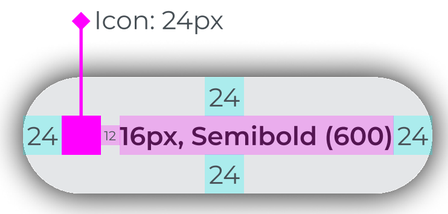
- **loading-primary**
- **loading-secondary**
- **shadow-primary**
- **overlay-primary**

Indeterminate loading time VS percentage

For every process where the **duration is (not yet) clear,** a **spinning loading circle** is displayed.
The loading circle can either be placed by itself (without text) or within a pill (with text).

Indeterminate



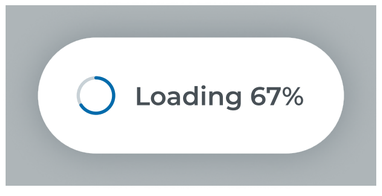


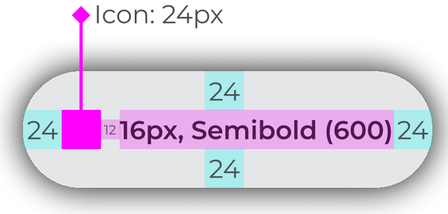
line-height: 24px;
corner-radius: 36px;
drop-shadow: 24px, 0px offset

For **processes where the exact progress (%) is known:**

- Fill the loading circle according to the progress % value
- Display the exact percentage as text

Percentage





line-height: 24px;
corner-radius: 36px;
drop-shadow: 24px, 0px offset
